Our Curriculum

The Children's Village has a long history of working with children and knows that children learn best through play. Play based learning is the foundation for all our programs and is delivered through an "Emergent Curriculum". The goals of our program are to offer fun and exciting learning opportunities that enhance the developmental, educational and life skill needs of children. We use the "How does Learning Happen" (HDLH) and "Early learning for Every Child Today" (ELECT) for the basis of our curriculum.

Emergent curriculum is a way of planning learning activities based on the children's interest and passions. With input and support from teachers and parents as co-learners, children plan their own activities and projects.

The end result is an increase in self-development, loads of educational opportunities, and tons of fun.
